

Expansion joints available at Cy-Bo Plastics

Ethylene Flexijoint® PTFE expansion joints are flexible connectors and tremor barriers designed to compensate for misalignment, absorb expansion and contraction, and isolate vibration and shock in process piping, tanks and pumps.

AVAILABLE SIZES:
 1/2" Ø TO 42" Ø ANSI FLANGES.

PTFE FLEXIJOINT®

- Low spring rates, perfect for plastic piping.
- Outstanding chemical resistance.
- Temperature: -70°C to 204°C.
- Resistant to Ozone and U.V. rays.
- Sound dampening.
- Uniform wall thickness.

FLANGES MADE FROM DURCOR®-62

- As strong as steel.
- Half the weight of steel.
- No corrosion.
- Temperatures: -40°C to 148°C.
- 5-year warranty.
